

Service : Documentation

Purpose

Collecting, conditioning and adequate presentation of results from analysis, screening or qualification.

The documentation is an essential proof of reliability or ability of your product. It is the result of previous sophisticated and long tests or an analysis. Therefore it will be basis of decisions and actions of consequence.

Informational value, completeness and form of the documentation are of particular importance.

Bluetest Expertise

We combine know-how and customers point of view to a compact and comprehensible presentation. Any lack of clarity and mistakes will be discovered and removed by four-eyes-principle.

Activities

Participants

Creator of documentation, measurement and test executives

Requirements, Input

Sample documentation, standards, project plan, results from measurements , protocols

Performance

Creation (in English or German language)

Proofread by second person

release

Result, Output

Shipment of signed document including measurement data and records
